KVASER
Advancing connectivity

Learn more about this product

Your Gateway to Efficient Connectivity

Kvaser mounting brackets provide a new way to secure your Kvaser interface, reducing potential for cable wear and improving the tidiness of the installation. These professional-grade 3D printed brackets are lightweight and can be easily mounted with double-sided tape, yet are sturdy enough to be securely fastened with screws via the pre-drilled holes on either side of the bracket, without adding unnecessary bulk to the device.

The material used to 3D print the brackets, PA 2200, is a robust, high-performance alternative to plastics like ABS. Resistant to chemicals, environmental and UV degradation, these mounting brackets are perfect for your toughest installation.

Warranty
2-Year warranty. See our general conditions and policies for details.

KVASER
Advancing connectivity

Major Features

- Set of two
- Distance between pre-drilled mounting screw ports: 66.5 mm
- Made of PA2200
- Resistant to UV degradation
- Lightweight
- Compatible with J1939, CANopen, NMEA 2000® and DeviceNet. Higher layer protocol translation handled by the user's application. For software support please see our Technical Associates products and our Software Download page (www.kvaser.com).

⚙ Technical Data

Certificates	CE, RoHS
Dimensions	30 x 80 mm
Material	PA2200
Weight	20 g

Support

Documentation, Kvaser CANlib SDK and drivers can be downloaded for free at www.kvaser.com/downloads.

Kvaser CANlib SDK is a free resource that includes everything you need to develop software for the Kvaser CAN interfaces. Includes full documentation and many program samples, written in C, C++, C#, Delphi, Visual Basic, Python and t programming language.

Kvaser CAN hardware is built around the same common software API. Applications developed using one device type will run without modification on other device types.

Compatible Devices:

Product name	EAN
Kvaser Memorator Pro 2xHS v2	00819-9
Kvaser Memorator 2xHS v2	00821-2
